Education & Research

Ph.D. in Hydrology and Remote Sensing

Department of Physical Geography, Stockholm University, Sweden.

Thesis title: Monitoring Water Availability in Northern Inland Waters from Space, available on [DiVA](#)

- I used Landsat images and maximum likelihood classification to quantify water occurrence and its changes in the Selenga River Delta. I used hydroclimatic data such as runoff, temperature, suspended sediment concentration, and lake water level to understand the drivers of the change in surface water occurrence.

- I developed the InSAR methodology to quantify water levels in Swedish lakes.

- I studied changes in a large set of lakes in Sweden and answered the questions regarding those changes and their drivers. I assessed the impact of human regulation (such as damming for hydropower, mining, irrigation, and transportation canals) on changes in lake water levels.

- I also taught hydrology courses (such as advanced hydrology and Water and Land Risk Assessment) and mentored Ph.D. and master's students.

Skills: Hydrology · Remote Sensing · Earth Science · Geographic Information Systems (GIS) · Hydrogeodesy · InSAR · Altimetry · SAR · Python & MATLAB programming · Machine Learning

M.Sc. in Marine Geodesy

School of Surveying and Geospatial Engineering, University of Tehran, Iran.

- Tidal modelling

- Bathymetry & geostrophic currents

- Advanced Global Positioning System

- Monitoring embankment dam deformation with InSAR

Skills: Remote Sensing · Hydrography · Bathymetry · Geographic Information Systems (GIS) · InSAR · MATLAB & Python Programming Languages

2019 – 2023

2011 - 2014

2006 - 2010	B.Sc. in Geomatics Tafresh University, Tafresh, Iran.
-------------	------------------------------------------------------------------------

Teaching & Supervision

2020 - 2022	Advanced Hydrology 7.5 credits (Stockholm University) Teacher assistant in Hydro-Geodesy. In this module, I taught students how to generate interferograms and interpret the fringe patterns relating to hydrologic connectivity and water level changes. I used ISCE software in this course.
2021 - 2021	Water Management and Pollution, 15 credits (Stockholm University) Teacher assistant in optimization. In this module, students learned how to model the most efficient way to mitigate pollutants' flow in a basin. I used the Pyomo model in this course.
2021 - 2022	Co-supervision of two master's students in Hydro-Geodesy (Stockholm University)
2019 - 2021	Tellus I – Physical Geography, 15 credits (Stockholm University) The course deals with hydrology, mass movements, rivers and flooding, oceans, coastlines, groundwater, the atmosphere and climate, arid regions, geomorphology, Quaternary geology, and global changes.

Training & Conferences

2021	Professional Development Course: Teaching and Learning in Higher Education (UL-1) at the Centre for the Advancement of University Teaching (CeUL), Stockholm University
2013 - 2022	Active participation in many international conferences such as the ESA Living Planet Symposium (2013 & 2022), EGU (2020-2022), AGU (2021-2022), Swedish Climate Symposium (2022), and Baltic Sea Science Congress (2019 & 2021 & 2023).

Professional Experience

2018 - 2019	Geophysical marine surveyor, data processor (multibeam echosounder), and cartographer at SEA WORK SURVEY (SWS) EST, Tehran, Iran. Geophysical surveying . Multibeam echosounder data processing . Seafloor mapping and cartography . Navigating drilling rigs . Debris removal . Writing Daily Progress Reports (DPRs) . Writing industry proposals
2015 - 2017	Researcher and instructor at Hydrography and Tidal Affairs, National Cartographic Centre of Iran (NCC). <i>Skills: Satellite Altimetry · Tidal modelling · Oceanography · Geostrophic Currents · Bathymetry</i>
